Subject: Applicant with a Strong Interest in your Program

Dear Dr./Ms./Mr. (Include coordinator and program director):

I am writing to express my continued interest in your program.

PARAGRAPH 1:

Let the program know that you have ties to the area and/or what about the program you think you could most contribute to or learn from? (limit to 3-4 sentences)

I am a resident of Maryland and have always dreamed of completing my residency in my home state so I could make a direct impact on the community that has supported me over the years. I also recently read that your program is leading efforts to revamp the anti-contamination protocols for healthcare personnel. This is an application of medicine that I find fascinating and would love to learn more about. I have an extensive background in pathology and could be an asset to your team.

PARAGRAPH 2:

Update on your missing documents, if any.

I have received notice that my USMLE® Step II CS scores will be in by late November. I just wanted to follow up with you to see if that was causing a delay in the processing of my application. If there is any additional documentation that you wish to see, I would be happy to provide it. I would like to show my commitment to your program and present the best possible application so that I may join your team.

PARAGRAPH 3:

Closing.

Please feel free to contact me at your convenience. My contact information is below. Thank you for your consideration and I look forward to hearing from you.

Kind Regards,
